

TRANTEX MODEL TP1500

TRAILER MOUNTED THERMOPLASTIC PREMELTER & APPLICATOR PACKAGES

Standard TP1500DH shown with fold down loading ramp.

Standard trailer features include:

- Easy Step Low Deck Trailer
- Four LP Bottle Racks
- LP Fired Power Supply
- Handliner Loading Ramp
- Tandem Axles
- Electric Brakes

Optional Features include:

- Automatic Lift Gate (In lieu of ramp)
- Automatic Lifting Winch (In lieu of ramp)
- Diesel Engine (In lieu of propane engine)
- Oil Jacketed Premelter(s)
- Overnight Oil Heater(s)
- Die Storage Racks

TP1500 packages offer an effective solution for a completely portable thermoplastic workstation. Packages come standard with a CH265M handliner, including a 4" or 6" extrusion die.

The burner system is fueled by a low pressure LP system controlled by a solid state, electronic thermostat. The TP1500's combination of fast start-up time, safety and quality will deliver productive service for many years.

TP1500DH (dual unit) shown with optional "Tommy Lift" automatic lift gate, and die racks.

All TP units are equipped with automatic spark ignition systems, eliminating operator exposure when lighting premelters.

Flash safe material feed doors designed to prevent injury to operator.

Trantex premelters come standard with LP fueled engines. Specify air or oil jacketed when inquiring about units. Capacities other than Trantex standard models may be requested. Specifications and ratings on units are subject to change without notice. HP ratings on power pack engines may vary depending on accessories on complete package units. Contact Trantex for detailed specification on unit desired.
